Finch La Trobe University Wider use in

psychology of confidence intervals (CIs), In

statistics, a population is a set of similar

items or events which is of interest for some

question or experiment. A statistical

population can be a group of existing objects

(e.g. the set of all stars within the Milky Way

galaxy) or a hypothetical and potentially

infinite group of objects conceived as a

generalization from experience (e.g. the set

of all possible hands in a game of poker),

Applications. The correlogram can help

provide answers to the following questions:

Is the data random? Is an observation

related to an adjacent observation?,
